Notes:

(\*) Reserved capacity to the re-gasifies operator in compliance with art. 6.3 of delibera 168/06 passed by the Autorità per l'energia elettrica e il gas

#### ENTRY Points interconnected with storages

ENTRY Points	Minimum contractual pressure [barg]	Transportation capacity (a)	Booked capacity (b)	Available capacity (a-b)	Connected to Snam Rete Gas network	Connected to S.G.I. network
STENI_WTH	Stogit	(1)	221 000 000	179 439 883 (**)	41 560 117	X
STEDG_WTH	Edison Stoccaggio	(2)	4 848 499	4 003 211	845 288	X

Notes:

(\*\*) The figure includes the booked capacity and the capacity used by Snam Rete Gas for transportation service.

(1) - Delivery point from storage of Cupello (San Salvo): Minimum contractual pressure 75 barg;

delivery points from storages of Cortemaggiore, Minerbio, Ripalta, Sabbioncello and Settala: Minimum contractual pressure 70 barg;

delivery point from storage of Sergnano: Minimum contractual pressure 65 barg;

delivery point from storage of Brugherio: Minimum contractual pressure 24 barg

(2) - Delivery points from storages of Cellino and Collalto on the S.G.I. network : Minimum contractual pressure 70 barg

35814801	Vittorio V. (S. Antonio) (\$)		58	3 000	2 500	500	X

Notes:

(\$) The delivery pressure will become 75 barg when the new pipeline Gagliano-Sparacollo will be completed

(S) Transportation service on interruptible basis, conditioned upon the presence of a fisic outflow from the Snam Rete Gas network to the redelivery point of Vittorio Veneto (code 34569001)

(#) The trasportation capacity is available from 12/10/2009.

## **Note of the file “Transportation Capacities LNG Storages and National Productions 30\_11\_09**

In the file have been highlighted **in red** the updates compared to the previous publication of the October 2009, 31st, included in the section “THERMAL YEAR 2009-2010 - TRANSPORTATION CAPACITY”.
