

THERMAL YEAR 2016/2017 Peak and Flat modulation Services

Information for the calculation of Ru factor, pursuant to Article 3.3 of Resolution 49/2015/R/gas

Total Volume of storage system	128.690.800.000	Kwh
Total Injection contractual Capacity of storage system	1.526.840.000	Kwh
Volume available for Peak and Flat Services	113.160.656.000	Kwh
Injection contractual Capacity for Peak and Flat Services	1.269.458.400	Kwh
Daily gas in stock	here	
Forecast of Storage gas in stock	here	

INJECTION CAPACITY AVAILABLE FOR PEAK AND FLAT SERVICES			
Gas in stock (%)	Gas in stock (Kwh)	Adjustment factor	Total Injection Capacity available (Kwh)
0%	-	0,560	710.896.704
53%	68.206.124.000	0,460	583.950.864
75%	96.518.100.000	0,420	533.172.528
81%	104.239.548.000	0,360	457.005.024
87%	111.960.996.000	0,280	355.448.352
92%	118.395.536.000	0,220	279.280.848
99%	127.403.892.000	0,001	1.269.458
100%	128.690.800.000	0,000	-

MAXIMUM/MINIMUM GAS IN STOCK FOR PEAK AND FLAT SERVICES		
Reference month for the calculation of Ru factor	$G_{min\ s,k}$	$G_{max\ s,k}$
april	21.812.000.000	38.716.300.000
may	30.351.398.000	54.562.718.000
june	44.202.018.000	69.896.554.000
july	59.644.914.000	84.695.996.000
august	76.658.274.000	97.379.674.000
september	93.649.822.000	107.413.194.000
october	104.752.130.000	113.160.656.000
