

14 March 2017

Dear User,

Following our communication of 22 February 2017, Stogit informs you that an additional extraordinary maintenance will be carried out for Stogit commercial applications, this will entail the outage of the above mentioned applications as follows:

- from 00:00 to 06:00 on 16 March 2017: during this period you will not be able to log into Stogit commercial applications. As result, the Gas-Day 15 March 2017 will end at 00:00. Finally between 00:00 and 03:00 you will not be able to manage any renominations through SAMPEI application.
- from 07:00 to 08:00 on 18 March 2017: during this period you will not be able to log into commercial applications.
- from 23:00 to 24:00 on 19 March 2017: during this period you will not be able to log into commercial applications.
- from 12:00 to 18:00 on 21 March 2017: during this period the SAMPEI and STS applications will not be available.

The maintenance is necessary in order to ensure the availability of Stogit applications in compliance with the New Balancing Regime (ref. Regulation EU 312/2014) which requires the unfailing availability and utilization of Stogit commercial applications during each day.

If you are using Internet Explorer, on completion of the maintenance, please mind to follow the following procedure: <https://support.microsoft.com/it-it/help/263558/how-internet-explorer-uses-the-cache-for-dns-host-entries>

We apologize for the inconvenience.

Best regards,
Stogit
