

## WITHDRAWAL PHASE – OCTOBER 13rd 2006

On the assumption of a total withdrawal of 8200 million cubic meters , the volume referred to the storage modulation service for the year 2006/07 is equal to 7600 million cubic meters .

## VOLUME PROFILES AND PERCENT BAND FOR MODULATION STORAGE SERVICE

	CUMULATIVE VOLUME	
	Percentage	Quantità ( MSm <sup>3</sup> )
Novembre (*)	11%	836
December	34%	2584
January	68%	5168
February	96%	7296
March	100%	7600

(\*) November quantity includes the October volumes.

The monthly volume will be defined during the Shippers' seasonal and monthly planning.

### Volume Profiles for Hydrocarbon Storage Services

In compliance with article 2,2 of DM 9/5/01 of the Italian “Ministero per lo Sviluppo Economico” and with point b)-par. 7.3 of “Condizioni del servizio di stoccaggio minerario e di modulazione 2006-2007”, Stogit publishes the volume profiles that, for each month, will define the maximum possible value to withdraw as per the following formula:

$$(S_{\min} / 120) \times n$$

where:

- $S_{\min}$  is equal to the Space conferred to the USER for the Hydrocarbon Storage
- $n$  is the number of days of the month to which the calculation of the maximum quantity is referred.

## WITHDRAWAL CAPACITY ADJUSTMENT FACTOR FOR MODULATION SERVICE AFTER ASSIGNMENT PROCESS 2006/07

Gas withdrawn	CAFs
70%	1.900
87%	1.189
95%	1.036
100%	1

Stogit can offer Withdrawal extra Capacity in case of availability of firm Withdrawal Capacity higher than the one as per Article 10.2 bis of Delibera 119/05, as modified by Article 14.13 of Delibera 50/06 issued by Italian Authority.
