

## **WITHDRAWAL PHASE 26th OCTOBER 2006**

Due to the protraction of the uncertainty that prevent Stogit from guaranteeing a Capacity Injection during the withdrawal initial phase, the Injection Capacity Adjustment Factor for the week from 1<sup>st</sup> to 5<sup>th</sup> November 2006 is equal to 0,05.

The daily Injection Capacity, deriving from the application of the above mentioned Adjustment Factor, will be guaranteed by Stogit subject to a daily injection of volumes, from today until the end of the Injection Phase, consistent with the same Adjustment Factor.

Otherwise, Stogit will update this Adjustment Factor.
